24th International Congress
of Byzantine Studies

22-27 August 2022

Digital Byzantium

Digital Byzantium features a series of projects developed by institutions and research centres in Turkey and Italy that provide virtual representations of Byzantium, cutting across spatial and temporal borders through a combination of archaeology, art, history, literature, folkloric traditions, and scholarly studies. These projects explore the multiple connections between places and people, their history and imaginary, as curators bridge linguistic, aesthetic, intellectual, and cultural borders through unique and meaningful perspectives. Digital Byzantium allows scholars, students, and the broader public to experience a Byzantium sans frontières, promoting its accessibility and knowledge beyond physical and cultural divides.

Come and visit us daily for enjoying our exhibits and video screenings!
